DID YOU KNOW...

Providence
St. Joseph Hospital

Instead of paying CNA $53,800 in union dues for no guarantees, you could turn that same amount into $125,000.

The graph below shows how much you could pay in union dues over 30 years versus how much that amount could grow if invested in your 401(k)

*Retirement savings calculated on a conservative 5% annual rate of return.
**Union dues based on an hourly wage rate of $68. This does not include any applicable initiation fees, fines, and/or assessments.

If you'd rather have your money invested in your retirement vs. pay union dues, **VOTE NO**.
